Getting Started with Equito

Rocksolid Estate AG partners with EQUITO, an EU-wide MiFID II-licensed broker, ensuring a secure and compliant investment process.

Through Equito, you can purchase the ROC Token and gain access to a diversified portfolio of commercial real estate.

This section provides a detailed step-by-step guide on how to sign up, verify your account, fund your wallet, and acquire the ROC Token.

The following link will take you to the investment page of Rocksolid Estate AG on the website of our broker Equito.

<https://rocksolidestate.com/invest>

1. SIGNUP

Before you can buy ROC token, you must first register with your email address with our broker Equito. To do this, click on the "Get Started" button and enter the same your e-mail address you used before for the Rocksolid Signup. You will then receive a 6-digit code that you can use to log in. For security reasons, you will receive a new code sent to your e-mail address every time you log in to Equito.

Didn't get the code?
The code could take up to a few minutes to arrive. Update your inbox every few minutes and check your spam folder.

2. VERIFICATION

After logging in, you can verify your identity under "Account Information". This "Know your Customer" (KYC) process is necessary for legal reasons in order to be able to purchase the ROC token.

The screenshot shows the Equito website dashboard. The user is logged in as 'nerek41371@wanbeiz.com'. The 'Account Information' menu item is circled in red. The dashboard displays several investment offerings, including 'Elevate nepremičnine PLC11', 'Elevate nepremičnine PLC10', 'Elevate nepremičnine PLC9', 'Rocksolid Estate AG', and 'Fast growing FinTech company'.

4

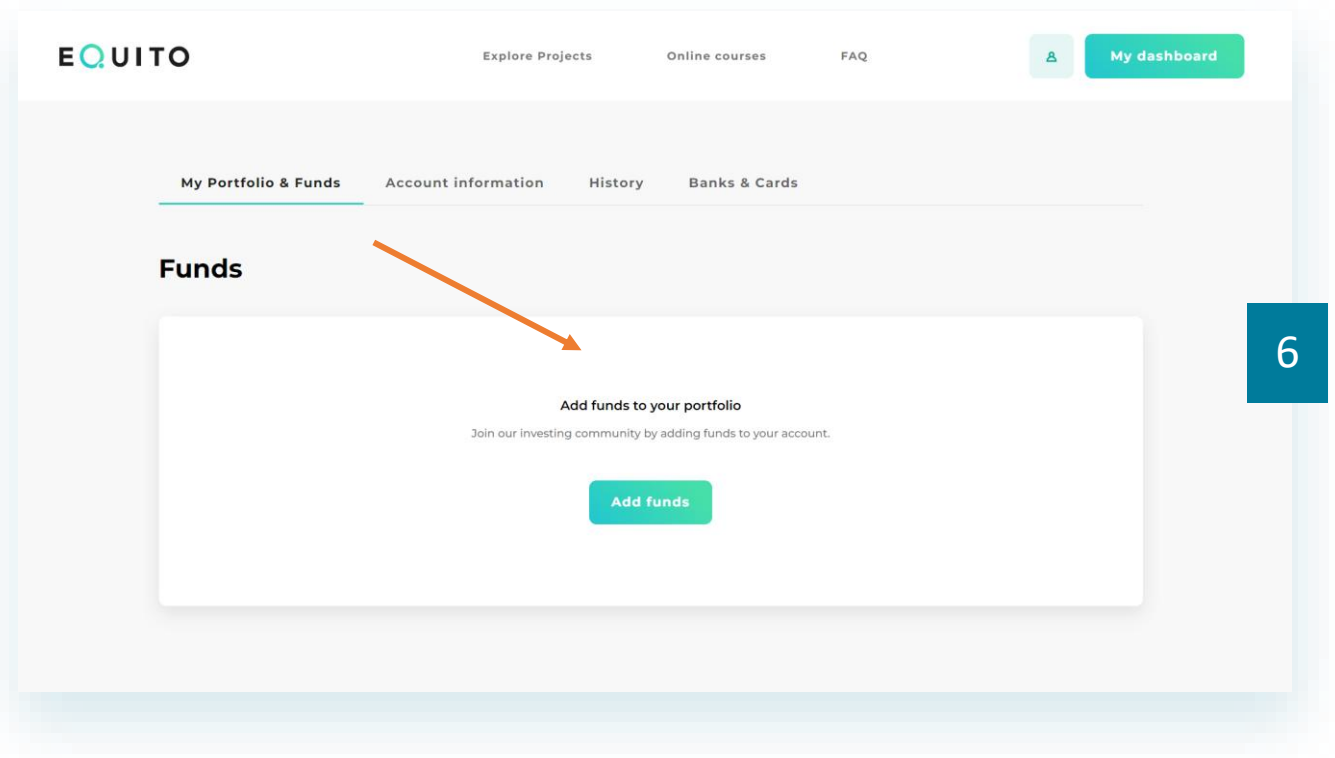

The screenshot shows the Equito website with a progress bar indicating the verification process. The progress bar has three steps: 'Email Verified' (completed), 'Verify your identity' (current step), and 'User categorisation' (pending). An orange arrow points to the 'Verify your identity' step. The text 'You're almost there' is displayed above the progress bar.

5

3. FUND ACCOUNT

Once your Equito account has been verified, you can top up your capital account on Equito and then buy the ROC token. To do this, navigate to "My Dashboard" after logging in and click on the "Add Funds" button.

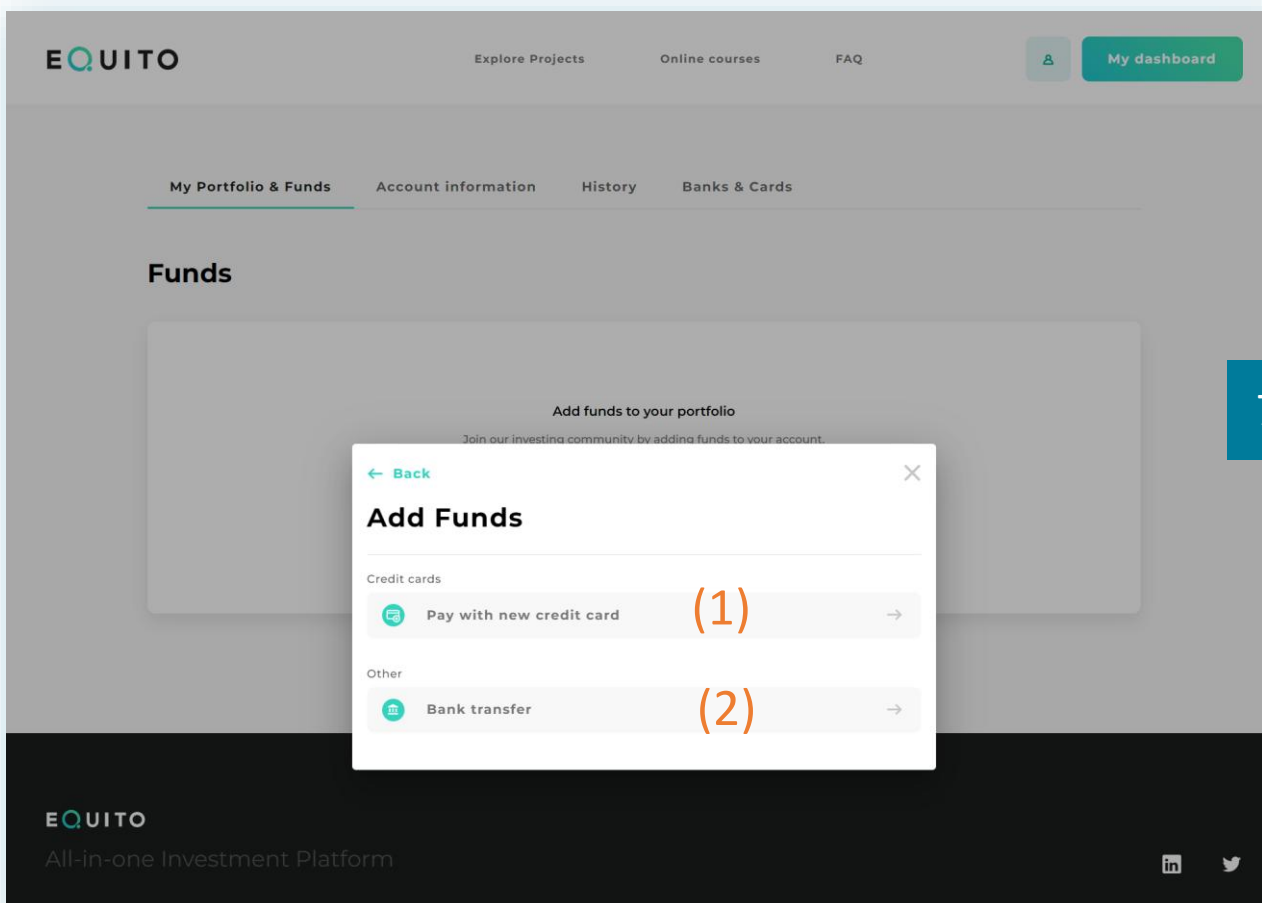

Deposits by credit card should be made almost immediately, whereas deposits by IBAN can take up to 3 working days, depending on the bank.

3. FUND ACCOUNT - Select payment method

After you have clicked on "Add Funds", you can decide whether you want to deposit by credit card (1) or bank transfer (2). If you want to deposit by credit card, click on "Pay with new credit card". To deposit via bank transfer, click on the "Bank transfer" field. Due to the high credit card fees, we recommend paying by bank transfer.

7

Deposits by credit card should be made almost immediately, whereas deposits by IBAN can take up to 3 working days, depending on the bank.

3. FUND ACCOUNT with credit card

When depositing by credit card, you must follow the instructions on the screen and enter your credit card number (which you can save for next time - don't worry, the data is encrypted). Credit card payments are also subject to a fee that Equito must pay to the credit card service provider (Mastercard, VISA, etc.).

The screenshot displays the Equito website interface. At the top, the Equito logo is on the left, and navigation links for 'Explore Projects', 'Online courses', and 'FAQ' are in the center. On the right, there is a user profile icon and a 'My dashboard' button. Below the navigation bar, a menu includes 'My Portfolio & Funds' (which is active), 'Account information', 'History', and 'Banks & Cards'. The main content area shows a 'Funds' section with a modal form titled 'Payment with new credit card'. The modal has a 'Back' button and a close 'X' button. It contains the following fields: 'Funding amount' (set to 0,00 with a red border and a message 'This field is required.'), 'Fee' (0 €), and 'Total' (0 €). Below these are 'Card number' (masked as XXXX XXXX XXXX XXXX), 'Expiration date' (MM/YY), and 'Security code / CVC' (XXX). There is a checkbox for 'Save this card to my account' and a large green 'Add funds' button at the bottom. The footer of the website shows the Equito logo, the tagline 'All-in-one Investment Platform', and social media icons for LinkedIn and Twitter.

8

Deposits by credit card should be made almost immediately, whereas deposits by IBAN can take up to 3 working days, depending on the bank.

3. FUND ACCOUNT with wire transfer

You can make bank transfers in EUR by transferring money from your bank account to the IBAN below. It is important to enter the "Reference/MEMO" number displayed in Equito as the payment reference so that the bank transfer arrives in your Equito account.

Now that you have invested, you will receive an email in the next few days prompting you to register in the investor portal. These few days are needed due to the minting process of the ROC Token.

However, you can already prepare by creating a MetaMask account and an Avalanche wallet. Once you log into the investor portal, you will need to add your wallet address to successfully receive your monthly payouts.

Setting Up MetaMask

MetaMask is a secure and user-friendly crypto wallet that allows you to store, manage, and interact with blockchain assets like the ROC Token. It is available as a browser extension for desktop and a mobile app for iOS and Android.

In this section, we'll guide you through creating a MetaMask account and connecting it to the Avalanche Network, so you can securely receive monthly payouts in EURC.

Access MetaMask here:

<https://metamask.io/>

1. Creating a MetaMask Wallet

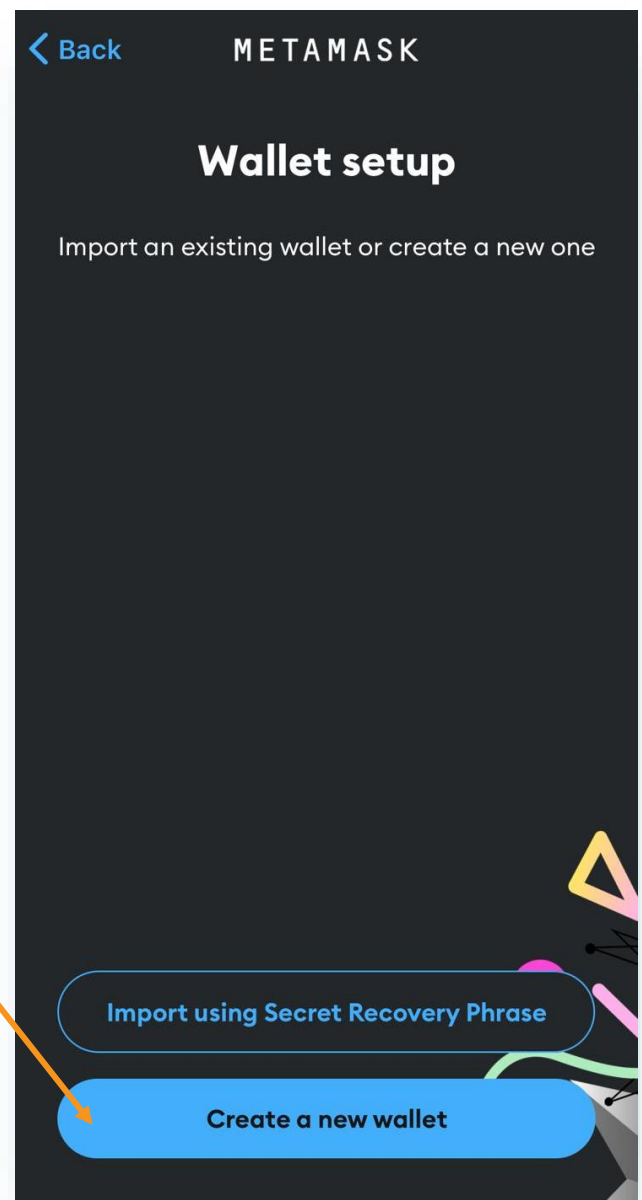

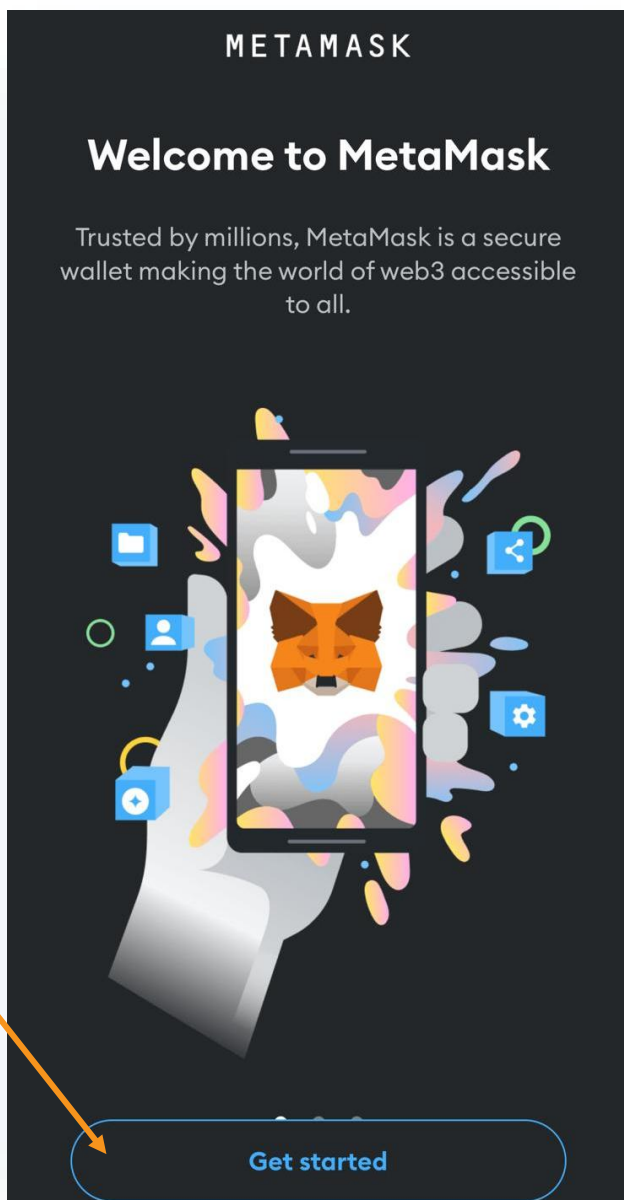

First download MetaMask: go to the official MetaMask website

(<https://metamask.io/>) and click on «download».

Install the MetaMask extension or app and open it.

Now, set up your wallet. Click on “Get Started” and choose “Create a Wallet”. Set a strong password to secure your account. MetaMask will generate a **Secret Recovery Phrase (12 words)**. Write this down and store it securely. **Never share this phrase with anyone!**

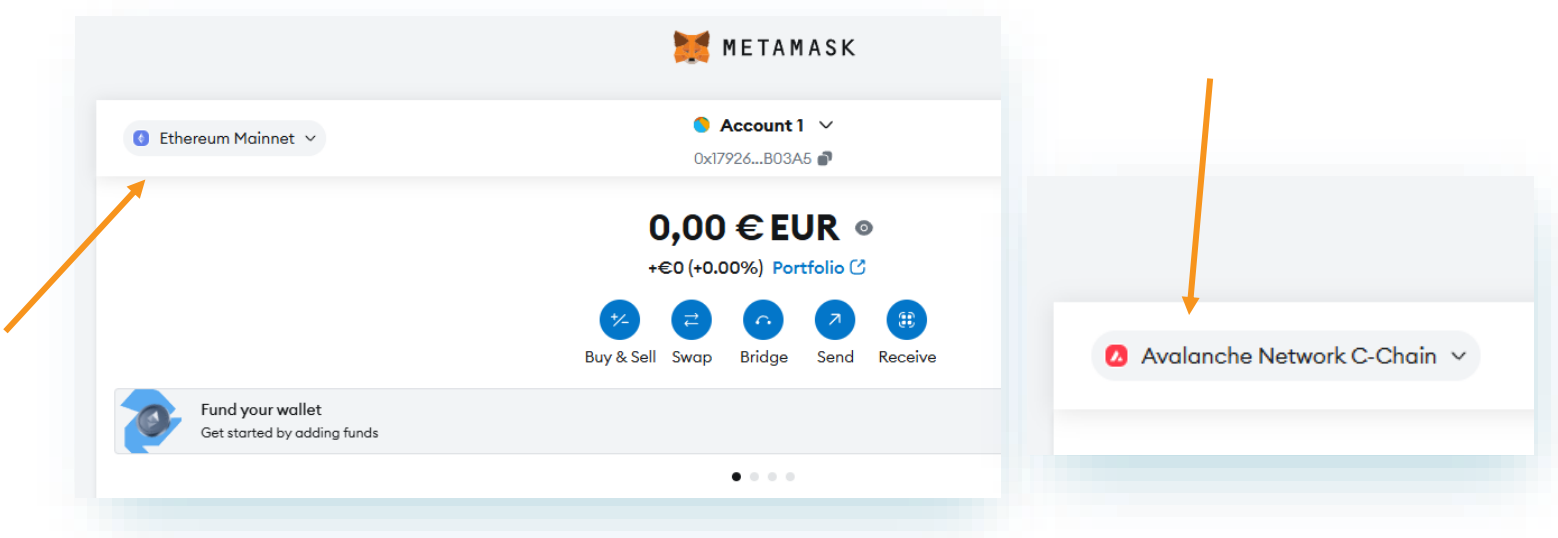

Confirm your secret Recovery Phrase to complete the setup. Your MetaMask wallet is now ready to use.

2. Connecting MetaMask to the Avalanche Network

By default, MetaMask is set to the Ethereum Network. You need to manually add the Avalanche C-Chain Network to interact with the ROC Token and receive EURC payouts. To do that, open MetaMask and click on the network dropdown (left corner – usually says «Ethereum Mainnet»). Search for «Avalanche Network C-Chain and click on «Add». Your MetaMask wallet is now connected to Avalanche.

Next, we'll show you where to get your Avalanche Wallet address and how to add it to the Rocksolid Investor Portal.

3. Good to Know: Essentials Before You Start Using Your Wallet

Before we move on and connect your wallet to the Rocksolid Investor Portal, here are a few useful insights to help you better understand how everything works.

💡 Let's start with something we've been mentioning quite a bit: EURC. But what exactly is it?

EURC (Euro Coin) is a stablecoin that is pegged 1:1 to the Euro (€), meaning 1 EURC always equals 1 EUR. It is issued by Circle, the same company behind USDC, and operates on blockchain networks like Avalanche and Ethereum.

Why is EURC important?

- **Stable Value:** Unlike cryptocurrencies that fluctuate, EURC maintains a fixed value of €1
- **Fast & Secure Transactions:** Enables instant, low-cost transfers globally.
- **Blockchain-Powered:** Works on decentralized networks, making it efficient and transparent.

In the Rocksolid Estate ecosystem, monthly payouts are made in EURC, allowing investors to receive stable, blockchain-based earnings with the security of a Euro-backed digital asset.

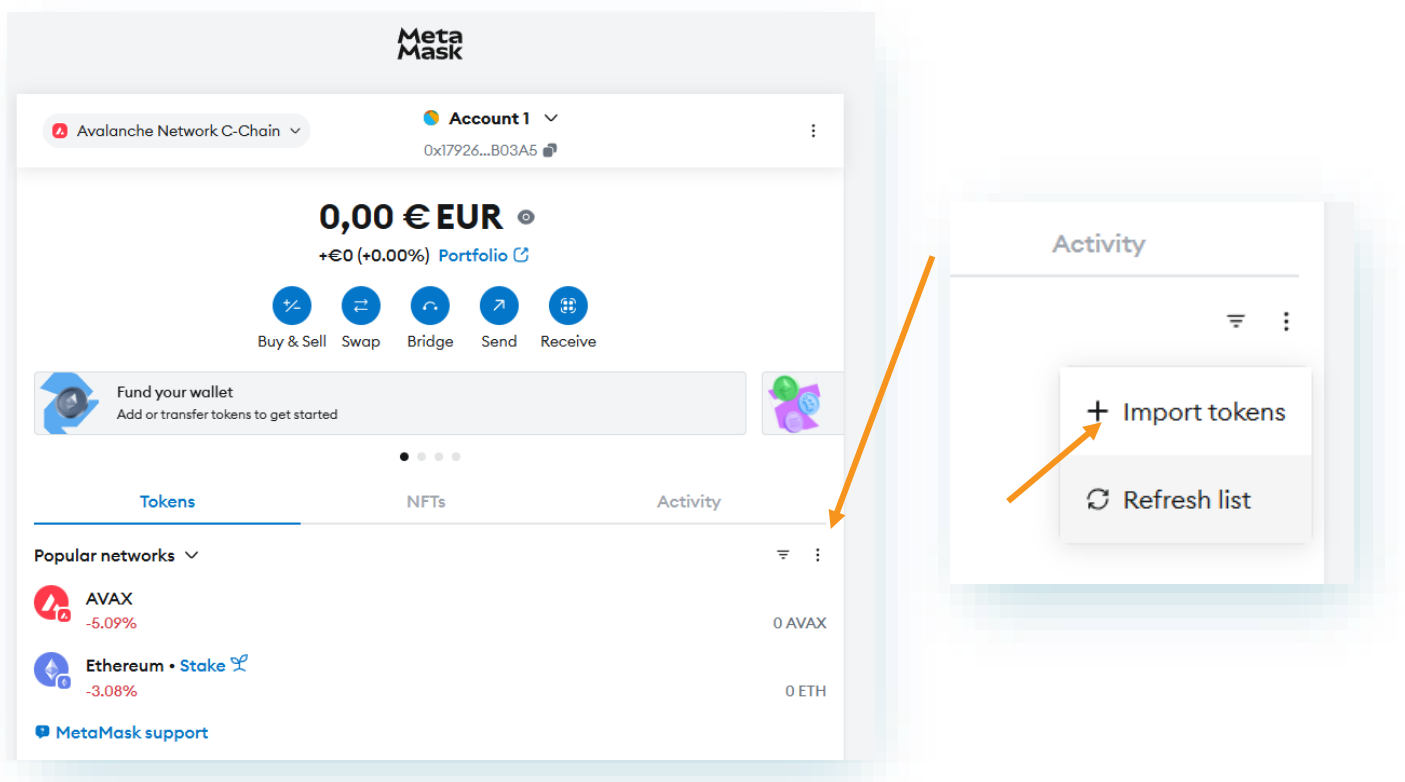

4. Good to Know: Essentials Before You Start Using Your Wallet

Now that you know what EURC is and how it works within the Rocksolid Estate ecosystem, you might be wondering: “Where can I actually see my EURC balance?”

By default, MetaMask only shows common tokens. So if you don't see EURC in your wallet right away — don't worry! You just need to add it manually. **Here's how:**

- Open MetaMask and make sure you're connected to the Avalanche C-Chain Network.
- Click on the three dots and then click on “Import Tokens”.

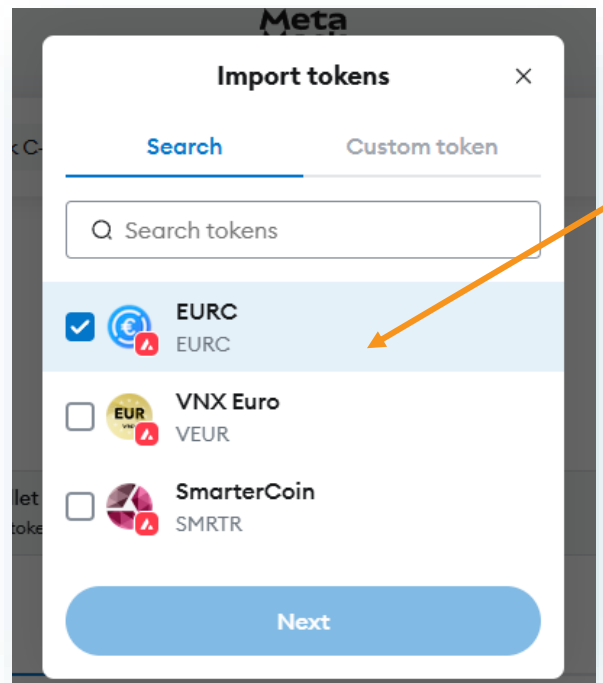

5. Good to Know: Essentials Before You Start Using Your Wallet

- In the Search field, type EURC.
- Once EURC (Euro Coin) appears in the list, click on it, then hit “Next”.
- MetaMask will ask, “Would you like to import this token?” – click “Import” to confirm.

That’s it! You’ll now see your EURC balance in your MetaMask wallet.

Once you receive EURC in your wallet, you might be wondering: “How can I convert this into real Euros or use it on an exchange?”

To do that, you’ll need to send your **EURC from MetaMask to a centralized exchange** (like Coinbase, Binance, or Bitpanda) that supports EURC on the Avalanche C-Chain. From there, you can trade it for Euros or other assets.

But here’s the important part:

To send EURC out of your MetaMask wallet, you’ll need to pay a small transaction fee (called “gas”) – and that fee is paid in AVAX (Avalanche’s native token), not in EURC.

Without AVAX in your wallet, you won’t be able to send your EURC anywhere. Even just a small amount of AVAX (e.g., 0.01 AVAX) is enough to cover several transactions. So before moving your EURC, make sure you also have a bit of AVAX in your MetaMask wallet.

Avalanche Wallet Address

To receive your monthly payouts in EURC, you need to generate your Avalanche Wallet address and link it to the Rocksolid Investor Portal.

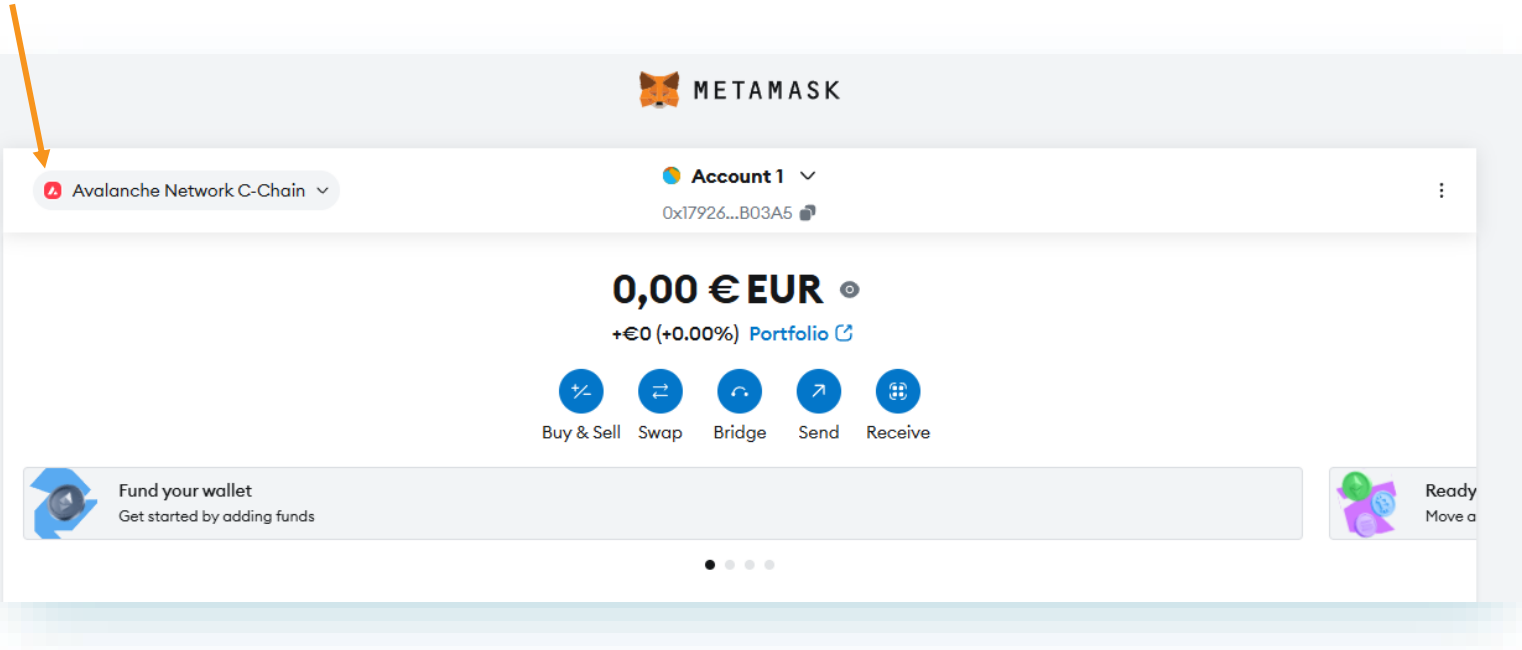

In this section, we will guide you through the process of finding your Avalanche Wallet address in MetaMask and ensuring it is correctly added to your Investor Portal account for seamless payouts.

1. Open MetaMask and Ensure Avalanche Network is Selected

Open MetaMask and make sure you're connected to the Avalanche C-Chain Network (if not, follow the previous instructions on adding Avalanche to MetaMask).

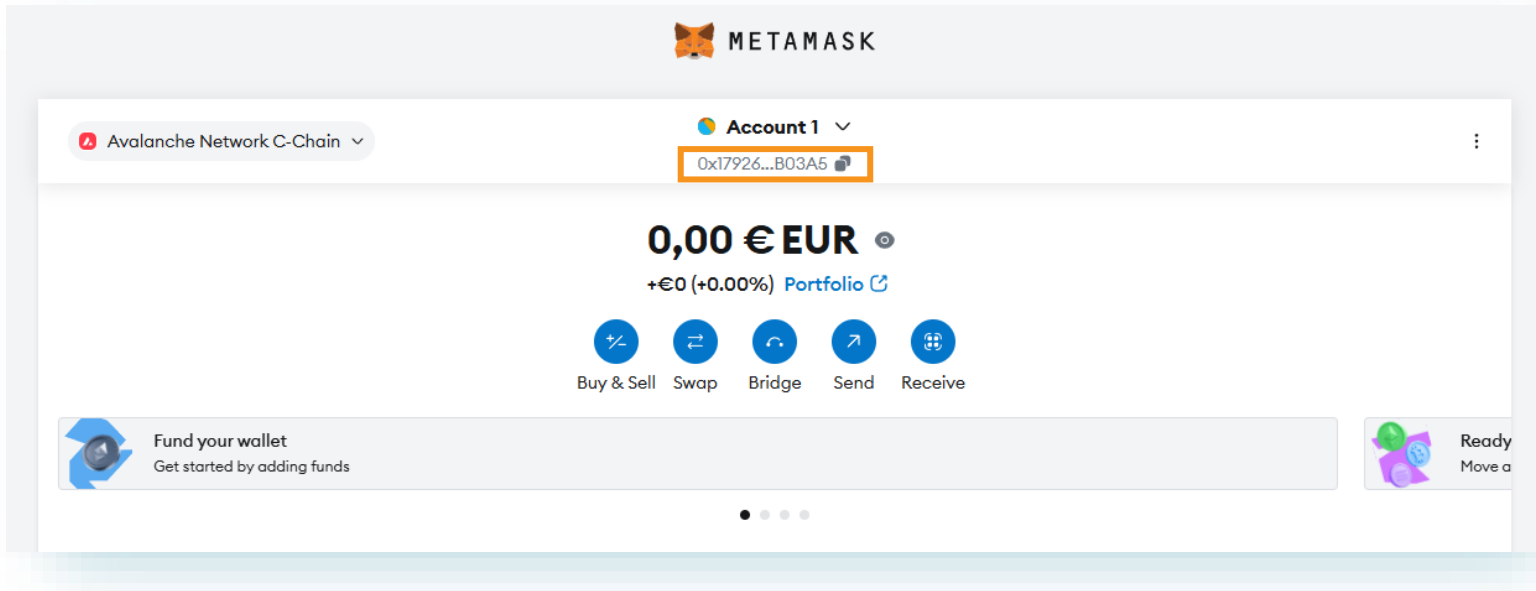

This is crucial, as your monthly payouts will not be processed correctly if the wrong network is selected.

2. Copy Your Avalanche Wallet Address

In MetaMask you will find your wallet address under your account name.

Click the copy icon next to the address to copy it to your clipboard.

This is your public Avalanche C-Chain address, which will be used for receiving ROC Token payouts in EURC.

Now that you have your Avalanche wallet address, you need to add it to your Rocksolid Investor Portal to ensure you receive your monthly payouts.

In the next few pages, we'll give you an overview of the Investor Portal and show you exactly where to enter your Avalanche address.

Please make sure to wait for the email from us inviting you to register on the Investor Portal before proceeding.

Rocksolid Investor Portal

The Rocksolid Investor Portal is your personal dashboard, where you can track your ROC Token holdings, investment performance, and monthly payouts.

In this section, we'll give you a quick overview of the portal's features and show you exactly where to find key information and how to add your Wallet address to receive payouts seamlessly.

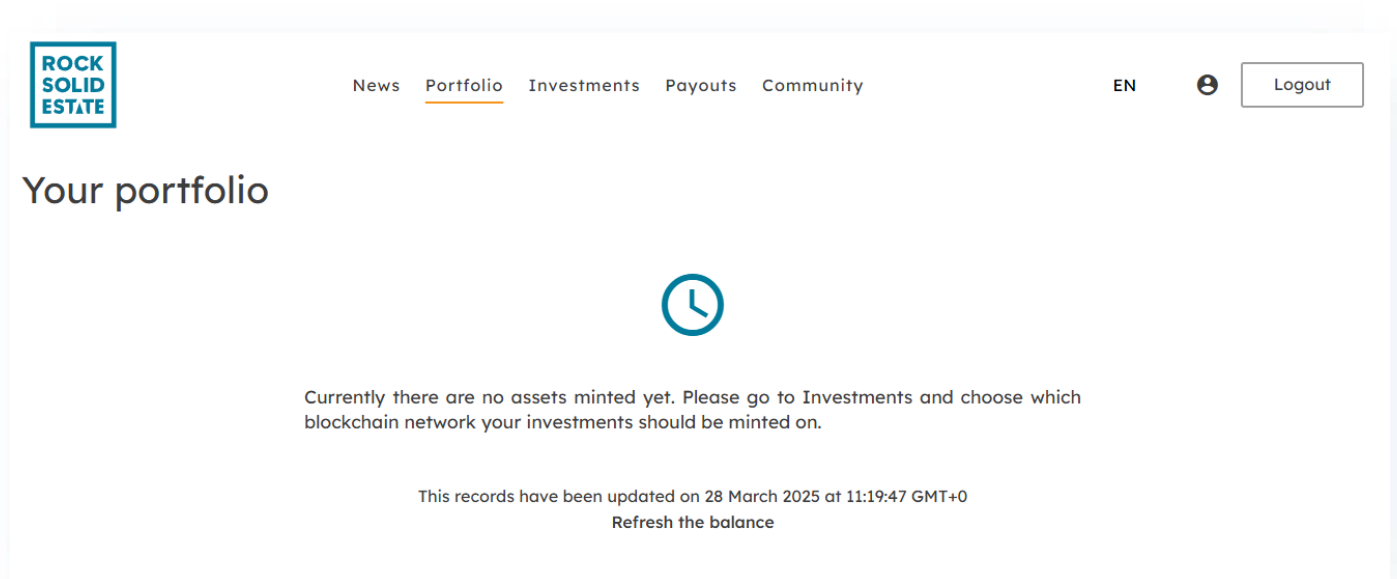

Please make sure that you use the email associated with your investments.

1. Log in to the Investor Portal

Use the email address you used during your verification to log in. You don't need to set a password. Instead, you'll receive a login code via email to access the portal.

Once you're logged in, you will see a message indicating that your wallet address still needs to be added.

2. Add you Avalanche wallet address

In the menu bar, navigate to the “Investments” section. There, you’ll see your investment history, and your first investment should now be visible.

Under Blockchain, select the Avalanche Network. Once selected, a “Set Address” button will appear under Transaction Hash. Click on it and enter your Avalanche wallet address.

Once you’ve entered your Avalanche address, everything is set. Your ROC Token and all future payouts will now be linked to your Avalanche wallet address.

Now just give it a short moment – the system needs a few seconds to register your token on the blockchain and link them to your address. After that, you’ll be able to see your investment listed under the **Portfolio** section.

Overview - Investor Portal

Logout

Let me give you a quick overview of our Investor Portal.

Starting on the far left, you'll find the **News** section, where we post regular updates. Additionally, you'll see our voting history, allowing you to review all past decisions at any time.

In the **Portfolio** section, you'll get a snapshot of your entire investment – including the number of ROC Tokens you hold and which blockchain they are held on. It serves as your general overview.

Next, under **Investments**, you'll see your complete investment history: when you invested, how many tokens you purchased, and on which blockchain they are registered. For any future investments, this is also where you'll select your blockchain and enter your wallet address.

The **Payouts** section gives you a clear view of your monthly payouts, helping you keep track of your earnings over time.

Now let's move to the **Community** section. Under Chat, you'll find a button to join our Investor-Only Telegram Group. In there, we share exclusive monthly content, engage in open discussion, and answer your questions directly.

In the Vote area, you'll see any active votings you can participate in.

And under Proposals, you have the chance to submit your own ideas or feedback.

We're always open to hearing your thoughts – your input helps us grow and improve together.

Finally, by clicking on your **avatar**, you can access your personal information such as your name, email address, tax number, and linked wallet address.

We've built this portal to be as clear, transparent, and empowering as possible – and we're excited to have you as part of the journey.
